## ROOF MATE - ROOFTOP POWER PEDESTAL

*designed  
for roofers,  
by roofers*

### Model #DPP-R-RT

- Uniquely designed permanent, leak resistant, one piece combination pedestal/gum box specific to roof top power needs
- Eliminates the need for troublesome, leaky, hollow shaft pedestals and custom flashing, and assembly of troublesome roof curbs and other loose components
- Ideal for multiple cable pass through installation such as thermostat, power and receptacle circuits for HVAC needs
- Design allows for multiple conductors to pass through one single assembly
- Patented open front tunnel shaft design allows for simple application and visual inspection of the final seal of gum pour = no more leaks!
- Simply secure the base to the roof, attach the pedestal body, run in cable from underside, mop up the skirt and pedestal side walls, apply internal gum and assembly - installation is complete!
- Body is 44" tall with a 7" x 6" tunnel opening that prevents the internal and external leaks always associated with roof top penetration
- Galvanized 14 gauge metal body, powder coated ASA 61 Grey with safety soft machine formed corners on the roof adds to ultimate quality, durability and appearance
- Two adjustable skirts are supplied, (one 10.5" and one 6") for a total of 16.5" as needed
- FS steel receptacle back box and DR45-RV Handy Hood are factory installed and ready for customer supplied receptacle and cover
- Design absorbs temperature movement by single combination gum box/pedestal, flexible for Canadian climates - rain, ice, snow, wind etc.
- Fully CSA certified assembly - weatherproof 3R

**THE ROOF PENETRATION DEVICE  
EVERYONE HAS BEEN WAITING FOR!**
