

Parking Lot Vehicle Pedestal Quick Selection Guide

A.C. DANDY

DELUXE VEHICLE POWER PEDESTALS

Deluxe 1A-S & 1B-S Stubby Body

Ideal for heavy traffic locations such as airport parking lots where elevated concrete base prevents damage from collisions and no curb setbacks are used. Body is 12" tall.

Designed with non-corrosive breakaway base, optional feedthrough quick connect terminals and molded circuit breakers up to 22kAIC.

Deluxe 1A & 1B Regular Body

Ideal for boulevards etc. where the pedestal is set back from the curb or wheel stop, and on grade level. Available with or without circuit breakers and feedthrough terminals. Body is 24" tall.

Designed with non-corrosive breakaway base, optional feedthrough quick connect terminals and molded circuit breakers up to 22kAIC.

INDESTRUCTIBLE POWER PEDESTALS

Flex Post 1FP

Ideal for use where collision from vehicles or snow removal etc. occurs.

Flexible body, bends down when hit and returns to vertical position.

Super Post 1I-SP

Ideal for super duty locations such as industrial plants, truck parks etc. where it is likely collisions will occur.

Structural seal fully welded and 3/8" base and flush receptacle to unique hidden collision proof receptacle.

Also available in flex post style.
