TREE SCAPE BOULEVARD RECEPTACLE ASSEMBLY

Model #TS-DPP

- EEMAC 3R enclosure
- Specifically designed as a heavy duty, durable, attractive & secure receptacle power pedestal for tree scape receptacle enclosures
- Designed so bottom base can be fitted onto various mounts such as cast tree rings, concrete foundations, stakes etc.
- Factory fitted with FSU 3/4 box inside enclosure for field installed duplex receptacle
- 316 marine grade stainless steel welded construction for ultimate strength & corrosion resistance
- Hinged, padlockable, gasketed front door complete with stainless steel clasps. Secures cords & receptacles from unauthorized use or removal - factory standard device boxes are only FSU 3/4 aluminum or Sceptor FSS PVC
- Open front & rear on bottom makes connection, cable entry & cord installation quick, easy and safe
- Safety soft, machine formed corners on roof and door adds to public safety
- CSA certified pedestal assembly

Options

- Top mounting ear with slot bolt mount provision
- Receptacle and weatherproof cover are supplied loose for field installation - specify size at time of order
- FSS PVC freedthrough receptacle box - comes with large base conduit entry knock out
